Coating Thickness Gauge

Model No. TCT - F01

Coating Thickness Gauge is a portable meter. It is capable of measuring coating thickness quickly, precisely and without injury, both for the laboratory and engineering environment. it is currently widely used in manufacturing, metal processing industry, chemical industry, commodity inspection and testing fields and is essential for material protection major.

- Thickness measurement using Magnetic method to measure the non-magnetic coating on a magnetic metal substrate
- Single point or two point method could be used to correct probe system deviation, in order to ensure the accuracy of the device in the process of measuring.
- Selectable measuring unit mile & μ.
- Power voltage indicator
- Speaker beep while operating.
- Power-off automatically when idle, manually power off available.
- Negative display function to ensure the accuracy of zero point calibration.
- Ultra-low power consumption, less than 10 is standby mode.
- Automatically identify the substrate

40 YEARS 1983-2023
TIME TESTED TESTING INSTRUMENTS

Technical Specifications:

Display	Digital (LCD)
Measuring Range	0-1500 µm
Power	2* AA batteries
Ambient temperature	10 - 50°C
Measurement deviation	0 calibration ±(1+3%) 2 point calibration ±(1%~3%H) H+1.5
Relative humidity	<85%
Minimum substrate	10 X 10mm
Minimum curvature	5mm convex, 5mm concave
Connectivity	USB and Bluetooth

Key Specifications:

Thinnest substrate	0.4mm
Weight	99g (with battery)
Size	102mm X 66mm X 24mm
Finish	Plastic Body Blue Color corrosion resistant finish

Included Accessories
- Standard Fe
- Plastic Shims 496±1, 50±1, 252±1, 100±1
- Plastic Box
