

Melt Flow Index Junior

Model No. MFI - Junior

Melt Flow Index Tester is a consistent tool useful for checking the flow properties of molten plastics/resins. PRESTO Melt Flow Index Tester is manufactured under various Test Standards ASTM D 1238-1992, IS 2267-1972, IS 2530-1963, IS 10810-1984.

** Applicable only upto 20 MFI **

- Microprocessor based PID controller
- Automatic sample cutting
- Digital Preset Timer for accuracy and repeatability
- Die Steel barrel for uniform and consistent heating of barrel/test cylinder.
- Heater enable and disable separate button
- Wide mirror platform easy to monitor the flow.
- Compact and stable structure

Melt Flow Index is defined as the rate of flow of extrudate of molten resins through a jet of a specific length and diameter under prescribed conditions of temperature, load and piston position inside a heated metallic barrel. Melt flow Index of thermoplastic material is expressed in terms of grams per 10 min of extrudate of molten resins that flow through the heated cylindrical barrel.
