## Impact Resistance Tester For Paints – Indirect

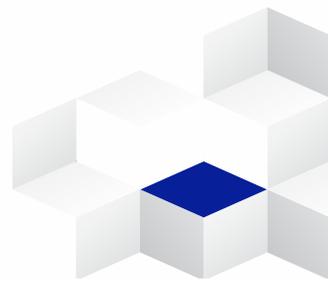

**Model No. : PIR-69**

**Impact Resistance Tester for Paints - Indirect** is a consistent tool useful for testing on coatings for crack formation; breaking off; adhesion and elasticity. A bulge is formed in the sheet metal by a falling weight with a hemispherical end. PRESTO Impact Resistance Tester for Paints - Indirect is designed as per **Standards** : ASTM D2794-93(2010), ISO 6272-2:2011.

## Features :

- High Quality rugged structure with corrosion resistant main body
- Provision of Punch to rest on the sample itself
- Single handed hassle free operation
- Separate weights provided to perform test
- Adjustable height of falling weights
- Fast Guiding Mechanism
- Highly accurate test results

## Key Specifications:

Maximum Impact Height	1000 mm / 1 meter
Diameter of Punch	15.9 +/-0.06 mm
Diameter of Die	16.3 +/-0.1mm
Maximum Weight	1kg / 2kg
Indenter Weight	150 +/-15g

## Highlights:

Lift Mechanism	Manual (Through Pin)
Material of Main Body	Steel / Aluminium
Dimensions	152 x 295 x 1380 mm

PRESTO Impact Resistance tester for Paints In-direct is used mostly in Paint Industry. The energy of load exerted can be varied either by using different heights of fall or different dropping weights.

Coating attached to substrates are subjected to damaging impact during the manufacturing of Articles and their use in service.

Thank you customers for choosing us as your partners in growth !
